Sounds good. One thing I forgot to mention last week, on the SPA, I didn't see a cost range for the offsite disposal. Didn't we talk about doing a 50-100% haz waste characterization on the sediments?

Erin –

Here's an update. The Building Demo FFS went through a technical review today. Danielle needs to make a few changes, but it's scheduled for an editorial review tomorrow. Ted will need to QC it on Wednesday. We should be able to get it out then. I'll send you the updated costs ahead of time. There's also another alternative that may or may not work with Alt. 3.

The South Pond document is mostly done, except for ARARs. We fell a little behind on our ARARs' reviewer. Nevertheless, this one should be following closely behind the Building Demo.

Once we agree on the strategies and costs, we'll continue working on the Final Report.

Thanks,

Mike
